NUTRITIONAL FRONTIERS

N-Acetyl Cysteine

Available in 90 count Vegetarian Capsules

• **N-Acetyl Cysteine (NAC)** is a non-essential, free form amino acid that is a highly stable form of cysteine.

• **NAC** has antioxidant properties and is necessary for the production of glutathione.

• **Glutathione** helps the body cope with oxidative stress which is associated with disease, and improves the number and activity of immune cells within the body.

• The antioxidant and free radical neutralizing properties of NAC might also help it support pulmonary and cardiac function.

• **NAC** helps to support healthy lung tissue and the body's natural defenses including cellular health.

• **NAC** helps to break down mucus in the respiratory tract and assists with rebuilding of lung tissue, and helps activate immune cells to improve immunity.

• **NAC** seems to be able to help clear mucus from the body as a result of several different mechanisms. NAC ruptures mucous disulfide bonds, which reduces viscoscity and it stimulates the clearance of mucus from the respiratory tract. NAC also may help maintain the inflammatory process within the normal ranges.

SUPPLEMENT FACTS

Available Bottle Size: 90
Serving Size: 1 Capsule
Servings Per Container: 90
