NUTRITIONAL FRONTIERS

ProBio-3

Available in 90 Vegetarian Capsules

This unique formula contains researched ingredients to:

- support digestive comfort and regularity
- reinforce healthy gut-barrier integrity
- promote balanced immune function
- nourish a diverse, resilient microbiome

A healthy microbiome influences digestion, nutrient absorption, immune balance, and gut-barrier integrity. Disruptions—from stress, diet, travel, or medication—can shift the balance of microbes and metabolites in ways that affect comfort and overall wellness.

The nutrients in **ProBio-3** are designed to deliver a complete pre-, pro-, and post-biotic approach that feeds beneficial microbes, supplies clinically studied probiotic strains, and provides postbiotic compounds that help maintain gut and immune homeostasis.

Bacillus coagulans (MTCC5856) (LactoSpore®)

A spore-forming probiotic optimized for survivability through heat, acid, and bile. MTCC5856 helps support digestive comfort, promotes healthy stool consistency, and contributes to a favorable microbial balance. Its spore coat enables room-temperature stability and targeted germination in the intestine for dependable activity.

Lacticaseibacillus casei (Lc-11)

Widely used for microbiome balance and immune modulation, Lc-11 supports a healthy ratio of commensal species and helps maintain everyday digestive comfort. It complements other lactobacilli and bifidobacteria for broader strain coverage across the GI tract.

Lactobacillus acidophilus (NCFM®)

One of the most characterized human-origin strains, NCFM® supports upper and lower GI comfort, assists in maintaining a healthy inflammatory tone in the gut, and promotes digestive enzyme activity for nutrient breakdown.

Bifidobacterium lactis (BI-04®)

A versatile, well-studied strain that supports GI comfort and immune balance. BI-04® contributes to short-chain fatty acid (SCFA) production indirectly by promoting beneficial cross-feeding within the microbiome.

Together, these complementary strains deliver 10 Billion CFU for comprehensive upper- and lower-GI support and everyday resilience.

Litesse® Ultra™ Powder (Polydextrose)

A well-tolerated soluble prebiotic fiber that feeds beneficial bacteria and supports the natural production of short-chain fatty acids (including butyrate) associated with gut-barrier integrity and motility. Polydextrose is gentle and suitable for daily use to help sustain microbial diversity.

CALCEOBIOTIC™ (Lactobacillus bulgaricus Lb-87)

A postbiotic complex providing non-viable bacterial fractions and metabolites that help reinforce tight-junction integrity, support a calm mucosal environment, and promote balanced immune signaling in the gut. Postbiotics work alongside probiotics and prebiotics to support a robust gut ecosystem—even when live strains are transient.

Serving Size: 1 Capsule | Servings Per Container: 90

Proprietary Probiotic Blend Bacillus coagulans (MTCC5856)(LactoSpore®) Lacticaseibacillus casei (Lc-11) Lactobacillus acidophilus (NCFM) Bifidobacterium lactic (BI-04)	10 Billion CFU (159 mg)
Litesse® Ultra™ Powder (Polydextrose)	50 mg
CALCEOBIOTIC™ Lactobacillus Bulgaricus (Lb-87)	50 mg

Other Ingredients: Microcrystalline Cellulose, Capsule (Hypromellose, Water), Magnesium Stearate, Silicon Dioxide

Suggested Use: As a dietary supplement, take one capsule daily, or as directed by your healthcare practitioner.

Warnings: If pregnant or nursing, consult your healthcare practitioner before taking this product. Color of this formula may vary due to color variations of the ingredients. Keep out of reach of children. Store in a cool, dry place.
